Solutions**

Modular International, Inc.

Modular International excels in the development of customizable outdoor lighting solutions for commercial and residential installations. Designs such as Concentrix, Tri-Fin, IRS® and others are available in base configurations, with options available to meet project specific lighting requirements.

Project specific designs are engineered and manufactured to exceed architect's, lighting designer's and customer's lighting specifications and expectations. From the development of new and unique lighting concepts, to modern reproductions of historical fixtures, Modular International is uniquely capable of meeting any lighting challenge.
